What Is The HopStart Package?

Our HopStart package is designed for new rat owners who are just starting with a baby rat, or who just haven't had time to organise getting all their rat's vet work done.

The first few months with any new pet can be daunting, so this package will give you peace of mind while providing your rat with premium veterinary care. This is an all-inclusive package made for rat owners.

Sterilisation

Sterilisation (desexing) is a very important part of preventative health care in rats. A number of problems can occur if your rat is left unsterilised including reproductive and mammary tumours.

Our HopStart package covers all costs associated with either surgical sterilisation or medical sterilisation (with a hormonal implant). We can discuss both of these options with you to help decide what is best for your rat.

Microchipping & Registration

Microchip identification is a safe and highly effective means of identifying your pet. Microchips enable lost rats to be reunited with their owners. Microchip implantation and lifetime registration on a national database is included in the package.

Health & Dental Check

Rats will often hide underlying illness from their owners. Our HopStart package includes a full health and dental check by one of our rat vets.

Includes**

Nails, Food & Treats

Long nails are no fun for anyone! We'll clip your rat's nails and then send them home with a bag of recommended rat food, as well as some yummy treats!

The price of our Rat HopStart package is dependent on the sex of your rat. Visit our website for pricing.
